Month's Settlements

Responsible for the Added Lus-

ter to the State.

November, as far as the ore and bullion

settlements are concerned, closes with a record never before reached.

The production, which has been restrictd for months on account of lack of facili-

tics, is responding to the improvements

ties, is responding to the improvements, permitting a greater capacity, which have been made in the smelters recently. Even now to meet the requirements of the producer new and larger smelters are necessary, and the contemplated enlargements in equipment and construction meditated by the American Smelting and Refining company, have projected with thorough knowledge of the present roseate conditions of the mining industry in Utah.

The amount of minted money exchanged for ore and buillon during the past month amounts to \$2.07,000 as against \$2.26,511 for the preceding month. The settlements have increased in amount cach week, with the first three days of the week giving a total of \$25,00.000. This last figure is due to the big settlement of yesterday, when McCornick & Co. settled for \$18,000 in silver and lead ores and \$38,290 in buillen. In the metal market yesterday silver ruled at \$9% cents an ounce with lead stationary at \$2.50 and \$1.20 per 100 pounds.

Mining Matters at American Fork.

AMERICAN FORK, Utah, Nov. 30.

Villiam Dunnizan of Alpine was in

William Dunnizan of Alpine was in American Fork yesterday, having just come down from the Cool Gardie property. The owners of the property have tunneled a distance of 200 feet, and have opened up a vela of ore ten by twelve feet, carrying heavily in copper, gold and silver. The owners are very much enthused over the find, and they will send a shipment of the ore to test its value.

a shipment of the ore to test its value,
Samuel L Adams, Jr., of Provo, who recently returned from St. George, has secured the Paymaster group of mines near
St. George. He expects to commence
work on the property at once, and expects to make them great producers.
Fifty thousand dollars worth of copper
was taken out of this property about
twelve years ago, but the slump in the
price of copper, and the distance of the
mine from the railway, compelled the
mine to suspend operations.

Mines and Prospects -- Furnaces and Mills

Copper Figures for Past Month

Year and Limit Not in Sight.

From the copper furnaces of the Salt Lake valley there was forwarded to the East during the past month 3,887,782 pounds of copper, this exclusive of the matte sent out by the American Smelting and Refining company, at the rate of 237,500 pounds per week, and a total of 950,000 pounds for the month. The striking gains made over last

month by the companies outside of the American Smelling and Refining com-pany, is due partly to the inscallment of new equipment enabling the plants of new equipment enabling the plants to handle a greater tonnage. Bligham Con. placed another furnace in commission, which aided in increasing this smelter's output ever 100,000 pounds above last month's production. Production at the United States shows an increase of 100,000 pounds, while Utah Con. tops the list with 250,000 pounds increase. The American Smelting and Refining company has handled a greatly increased production during the month. increased production during the month and probably shipped 1,000,000 pounds of copper matte during the month.

The total for the month is practically a 50 per cent increase over the same period last year. The record of production at the vari-

our plants for the month of Novem-

ber is reported as follows:	
Utah Co olidated 1,550,000 Utiled 4cs 1,176,176 Bing! Consolidated 1,161,65	18

CYANIDE MILL ON THE WAY.

Machinery Being Hauled by Wagon From Cisco to Basin.

Special to The Tribune BASIN, LA SAL MOUNTAINS, Nev. Nov. 36.-The machinery for the Gold Basin cyanide mill of the Inter-State Mining sin cyanide min of the inter-state animals company arrived at Cisco last week and is now being hauled into the Basin under contract by 1 bomus Branson, the saw-mill man, and recently elected County Commissioner. The consignment consists of engines, cyaniding tanks, piping and all the attachments, and a 2000-foot wire rope trainway. The weight is over 200,000 pounds.

The bollers for this plant were hauled in The hollers for this plant were hauled in here last winter from Thomson Springs, via Moab, but Manager J. H. Clark experienced so much trouble and unnecessary expanse he concluded to try the Clark coronic, the natural outlet and inlet into this country. There will also be about \$6,000 hounds of provisions and supplies to follow the machinery.

This large abundancy will necessitate the

this country. There will also be about 1000 pounds of provisions and supplies to follow the machinery.

This large ahymesti will necessitate the building of a new road, instead of going via Coastleton. From the Richardson cut-off in Castle valley the new road will be built nerose the valley, above Round mountain and up by the Porcupine Spring ranch and onto Wilson mesa through Porcupine guich, decreasing the distance and making the grade much easier and more practicable, completely cutting the town of Castleton out and eventually making the supply point for the La Sal country at Porcupine Springs.

Manager Clark has had this project in view, for some time and will contribute largely to the completion of the road work lessening the distance to the railroad fully thirty miles from Gold Basin.

Everything at the Inter-State mill and mines is now in shape for starting up the plant as soon as they get this machinery in place, and that will take only a short time. A beautiful open winter being now assured, Manager Clark announces that when the mill is once put in motion he will keep it going indefinitely and thousands of tons of ore are ready for de-livery.

THE MONTH'S DIVIDENDS.

Centennial Eureka Profits in U. S. Dividend Fund.

The dividend record for the month of November closed on a total of \$220,000, exclusive of the sum of \$100,000 transferred clusive of the sum of \$100,000 transferred by the Centennial Eureka to the dividend fund of the United States Mining com-pany, of which it is a subsidiary unit. From the fact that this amount has not been distributed through its proper chan-nels as yet, it can scarcely be classed with the others which were distributed. The showing for the month is consid-ered an excellent one. In addition to the sum, other profits have been distributed which, divided through private corpora-

NEW YORK'S RICH SHIPMENT.

Rumors of Poor Showing Proved Groundless.

The mystery surrounding the last shipthent from the New York, which led to
the circulation of hear rumors, is cleared
away with the announcement of the assays, the richness of which puts a full
stop to disparaging comment. From the
two lots placed on the market, the official
reports are as follows:

The first let, amounting to twenty-three
and a half tons, first class, showed 171.3
silver, 16.4 lead, 1.69 gold, with a total
value of \$172 to the ton.

The second-class shipment amounted to
ten and a half tons, as follows: 5.2 lead,
25.7 silver, 80 cents gold.

Manager Deming amounces that there
is no more second-class ore in sight. Sixteen tons of first class is now on top of
the ground, with more to follow. Another
big shipment will be made within ten
days. tgent from the New York, which led to

Copper Opened Strong and Active.

Copper Opened Strong and Active.

BOSTON, Mazs., Nov. 20.—Coppers were generally active and strong at the opening but developed a period of duliness after the first hour that continued until near the closing. The tone was decidedly firm throughout especially for the Utah coppers. United States Mining was the leader and advanced sharply on the unnouncement that Adolph Lewisohn had become a director in the company. The metal continues very strong and much ligher prices are predicted for the shares. Hornblower & Weeks, brokers, 53 State street, Boston, and 19 Wall street, New York, furnish the following quotations.

MONTH ON 'CHANGE

Manifest Improvement in Prices and Volume of Business, The business for the month on the min

ing exchange shows a decided gain over that of the preceding month. The num ber of shares changing hands was 915,609% for which \$215.836.79 was paid. The in vestment list gained in strength during the month, particularly in the case of Daly West, which during the month of October, suffered a severe decline. While October, suffered a severe decline. While it was offered at \$11 the first of the month, the last day shows \$14 asked. Among the youngsters. New York was the most sensational feature, this stock on notice of a rich strike almost trebled in price, reacting somewhat toward the close. Others in the same class to show good advances were Carisa and Silver Shield. Walsash moved ahead sharply. May Day, the October sensation, moved down the scale somewhat but romains in demand. Ontario shows a slight relax as foces Mammoth, neither due to any expected reduction of profits. During the menth the Scottish Chief was added to the list on the exchange, and has given a good account of itself. On the whole the trend of prices was decidedly upward and the business on the exchange shows a tendency to increase in volume during the coming month.

Yesterday the bear element secured tomporary control of the morning's market, and hammered May Day flercely. Afterwards concentrating their efforts on New York. The afternoon brought a revival of prices, although New York was weak at the close.

year for the afternoon brought a re-ival of prices, although New York was weak at the close. The day on the board closed with the aic of 52,060 shares of stock for \$10,113.13 and on the following market:

WASHINGTON-Willard, Raleigh. Ohio Copper Co.

Buys Winnemuck New Owners to Enlarge Mill and Thoroughly Develop a Promising Old Property.

Through negotiations brought to a close yesterday, the old Winnemuck group of mines at Bingham was added to the estate of the Ohio Copper company in that camp. The mill which has been operated by the purchasing company under a lease is included in the sale. The consideration is said to be in the neighborhood of \$50,000. Among the vendors are W. C. Staines, Judge William R. Hall of the District court

and the J. F. Woodman estate.

The Winnemuck is one of the oldest properties in the State. It was operated for many years never at a greater depth than 400 feet. From the upper levels has been taken some of the most sensationally rich silver ore known to

velopments to be suspended at a depth of 400 feet, the proper® was owned by a number of Hollanders. They made abortive attempts to operate, but havng no facilities for handling the water

The ledges are long and well defined. and at a greater depth it is considered that the property will prove a most valuable asset to its new owners. The mill capacity is to be doubled by the addition of eight more Wilfley tables and another siliner. With this equipment, it is safe to say that the current. nent, it is safe to say that the output of the Ohio Copper company will be loubled. The development of the Winemuck group is to begin at once With this property and that which it already owns at Bingham, the Ohlo Copper company takes rank among the iant companies of the State

HIGH-GRADE COARSE GOLD.

ere From Blue Ridge Group on the Virgin River.

secial to The Tribune. CALIENTE, Nev., Nov. 30.-Jack Furman and Dick Lyman, part owners of the Blue Ridge group of free gold claims, ten miles south of the upper Virgin river, passed through Callente this week with samples of ore taken from a two-foot vein recently struck on their claims, showing an enormous quantity of high-grade coarse gold, going into thousands of dollars per ton. If they decide to treat their ore at the mines, it means putting in ten miles of water pipe to-convey water to their properties. In October they were offered 340,000 for the five claims comprising their group, by Norman & Madison, mining brokers of Chicago, whose expert, James Finley, examined the properties thoroughly and recommended the purchase at that figure. Since that time strikes of considerable magnitude have been made on the Black Diamond and Bull Dog, showing increased values and size of ledges, and the value of the group has appreciated to many times that figure. They have ten miles south of the upper Virgin river.

value of the group has appreciated to many times that figure. They have opened up three distinct veins of high-grade ore on their various claims, show-ing values of from \$150 to \$6500 per ton, and have completed \$45 feet in develop-ment work in shafts, tunnels and open cuts.

The San Pedro. Les Angeles & Salt Lake Railroad company will put in side tracks on the south side of their right of way in Callente within the next thirty days. They have completed their new coal chutes and twelve buildings for the occupancy of their employees and laid the foundation for the new twelve-stuli roundhouse here. They will begin track laying on their branch line from Callente north to Wells, Nev. as soon as the through line to Los Angeles is completed. They will begin the erection of a large, expensive depot building on the south side of the right of way within the next thirty days, and are pushing improvements here at top speed.

U. S. MINE'S MEETING.

No Action on Dividend-Lewisohn a Director.

At the usual meeting of the United States Mining company, held yesterday, the dispatches state that Adolph Lewisohn was elected to fill the vacancy on the was elected to fill the vacancy on the board of directors. No action was taken regarding a dividend. The stock closed strong, selling at \$27.62½ a share.

The following comment from the Commercial Bulletin is apropos:

"At last United States Mining seems to have got under way with the rest of the copper share market, and a good rise is looked for. As we have pointed ont before, it is beyond question that certain interests have steadfastly kept the price down for the purpose of accumulating stock in the same manner that Utah Consolidated stock was accumulated under the per share. It is now said that insiders have secured a large amount, and are willing to let things take their own course, an explanation which appears perfectly plausible in view of the firmer tone. At any rate, no selling pressure is in evidence, and everyone appears to be in haste to buy the stock. The opinion of the street is that the prospects for a rise of several points are good.

"Sait Lake advices say that the smelter is working saitsfactorily, and that November's production and net earnings will be exceptionally good. The lead smelter is almost completed, and lead ores are beginning to be sent to the ore bins, which have a capacity of 29,600 tons." board of directors. No action was taken
